## The Theme of PaushtiCon 2023:

# Ensuring Sustainability in Food and Nutrition

The Sustainable Development Goals (SDGs), also known as the Global Goals, were adopted by the United Nations in 2015 as a universal call to end poverty, protect the planet, and ensure that by 2030 all people enjoy peace and prosperity. There are 17 sustainable development goals. These integrated 17 SDGs recognize that action in one area will affect outcomes in others, and that development must balance social, economic and environmental sustainability. United Nations also declared year 2022 as the International Year of Basic Sciences for Sustainable Development and focuses on links between basic sciences and the Sustainable Development Goals. Much of India's development agenda is mirrored in the Sustainable Development Goals. Hence, the theme for the 1st PaushtiCon was selected as "Ensuring Sustainability in Food and Nutrition".

## Subthemes:

From the 17 SDGs, we selected 6 themes for PaushtiCon 2023 which are connected closely to Food, Nutrition and Health.

2 ZERO HUNGER

### SDG 2: Zero Hunger

Aim of SDG2 is to end hunger, ensuring food security through appropriate agricultural practices. India ranked 101 out of the 116 countries on Global Hunger Index indicating the urgent need to address the SDG of Zero Hunger in India.

### SDG 3: Good Health and Well-Being

Appropriate nutrition can prevent or reduce the severity of many health issues such as non-communicable diseases (NCDs) (obesity, diabetes, hypertension, dyslipidemia) as well as micronutrient deficiencies and improve quality of life.

3 GOOD HEALTH AND WELL-BEING

4 QUALITY EDUCATION

### SDG 4: Quality Education

SDG4 aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. Imparting evidence-based nutrition knowledge to people of various age groups can improve their food intake and thereby promote health and wellbeing.

### SDG 9: Industry, Innovation and Infrastructure

SDG9 highlights the need to build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation. Innovations in food industry like nano-technology, use of recyclable packaging etc. can give rise to a more sustainable health for all.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

### SDG 12: Responsible Consumption and Production

As per the Food Waste Index Report 2021, around 931 million tons of food waste were generated in 2019. In India alone, the household food waste was estimated to be 50 kg per capita per year. Hence, creating awareness about various food recycling initiatives will make consumers more responsible.

### SDG 13: Climate Action

Aim of SDG13 is to take urgent action to combat climate change and its impact. There is a significant bi-directional relationship between food, nutrition and climate change. Hence, awareness regarding the effect of climate change on nutrition and ways to reduce carbon foot print & environment damage is the urgent need.

13 CLIMATE ACTION

**With these 6 sub-themes, PaushtiCon 2023 will abreast food and nutrition students, academicians, researchers, and working professionals with the latest developments in food and nutrition. This will empower them to ensure health and wellbeing for themselves and the community at large.**

**PaushtiCon 2023 invites oral and poster presentations on original research work from scientists, academicians, researchers, Ph.D. Scholars and students (Post Graduate Diploma or Masters) on the above subthemes of the conference.**

**Details for abstract submission are provided later in the brochure.**
